# Sustainn

CSR Strategy 2019-2021

## Ethical Behaviour

Our work is marked by our ethics. These ethics are represented in our values, which are the compass that marks our path.

Our ethical behavior is based on Sustainn's code of conduct, which contains a guide for action in conflict situations, specifically: human rights, regulatory compliance, bribery and bribery, reputation, discrimination and harassment, risk prevention, quality, data protection and respect for the environment.

### Main Challenges

- Ensure compliance with the code of conduct
- No complaints from any of our stakeholders.
- Extend our commitment to ethics to suppliers, subcontractors and collaborators...
