# Sustainn

CSR Strategy 2019-2021

## Sustainable Future

We believe in what we do and encourage the construction of a truly sustainable future. If we want to make this a reality and build it through cooperation and collaboration, we know that the work must start with ourselves. So, first step is to work on our sustainability. We establish actions with clear objectives to preserve natural capital, keep materials in the system and reduce pollution.

### Main Challenges

- ▶ Portfolio of services aimed at achieving the goals of the Sustainable Development Goals.
- ▶ Offsetting emissions through renewable energy projects
- ▶ Diagnosis of circularity for Sustainn
- ▶ Sustainable procurement
